American Systems, Inc.

Established in 1975 and headquartered in Chantilly, VA, AMERICAN SYSTEMS is an employee owned company with 2012 revenues of \$270 million and more than 1,600 training experts, engineers, analysts, Subject Matter Experts (SME) and technicians operating worldwide. For over 35 years we have continuously supported our Navy customers in Orlando (predominantly Naval Air Warfare Center Training Systems Division (NAWCTSD) organizations) with trainer design and production, training services and technology-based curricula support. As one of the prime contractors for the NAWCTSD Training Services Contracts (TSC) I and II, we have successfully executed numerous delivery orders - on time and within schedule and budget.

AMERICAN SYSTEMS currently holds a Top Secret Facility Clearance and has two SCIFs. We are an ISO 9001:2008 registered company; the scope of our registration applies to four operational programs and seven core managed processes. We implement repeatable and predictable Software Engineering Institute Capability Maturity Model® Integration (CMMI®) for Development (CMMI-DEV) 1.3, Level 3-based processes; and achieve continuous improvement and customer satisfaction by realizing greater efficiencies and cost savings.

AMERICAN SYSTEMS is a leading provider of Aviation Maintenance Trainers, Survival Trainers, Flight Trainers, Advanced Electronic Classrooms, and Advanced Distributed Learning products and services. We provide strategic business offerings of: Consulting Services; Custom Solutions; Design & Installation Services; Professional, Technical & IT Services; Human Capital Services; and Managed Services. Our customer base includes: Department of Defense (Navy, Marine Corps, Army, Air Force, DIA); Department of State; Department of Homeland Security (TSA); FAA; other Federal Departments and Agencies; various state and local Government entities; and numerous Fortune 1500 commercial businesses.

AMERICAN SYSTEMS Customized Creative Solutions Division provides a wide variety of training products and services. These products and services include task and training analyses, Interactive Multimedia Instruction (IMI) to include Interactive Courseware (ICW), Web-Based Training (WBT), Sharable Content Object Reference Model (SCORM) conformant and Section 508 compliant Advanced Distributed Learning (ADL), mobile learning, Instructor-Led Training (ILT), and desktop simulations. Our full range of training services and distance learning products are designed to meet customers' adult-learning requirements. We specialize in delivering a total solution aimed at improving job performance so that mission accomplishment is assured. We employ a systems approach to training that is consistent with higher education processes and procedures. We produce training services and products under a continuous process improvement philosophy.

We provide technology-based development and distribution, integration with Learning Management Systems (LMS), development of performance skills through simulations and part-task trainers, classroom training, and robust electronic classrooms.

Apptricity Corporation

Since 1999, Apptricity has provided enterprise applications and services used to automate:

- Supply Chain Management
- Financial Productivity
- e-Procurement

The company's early innovation to build a service-oriented architecture (SOA) framework has led to solutions that adapt dynamically to changing, real-world issues. This optimizes the use of limited capital resources and achieves fast return on investment (ROI) due to rapid deployments that reduce operational costs.

Another key Apptricity innovation is its proprietary migration facility, which drives life-cycle cost savings and provides higher ROI when compared to other enterprise solutions. In part, this capability separates customer-specific configuration information from application logic so that upgrades to the software system do not trigger massive amounts of rework.

Apptricity serves leading commercial enterprises across several industries including Wal-Mart Stores, AT&T Inc., Energy Futures Holdings (f/k/a TXU Corp.), Cameron International Corporation, Goldman Sachs Japan, and Dominion Enterprises as well as federal organizations such as the United States Department of Defense and Army Corp of Engineers.

<http://www.apptricity.com/>

ArcSource Group, Inc.

ArcSource Group, Inc. founded in 2000, is a SBA 8(a) and certified Woman Owned Small Business (WOSB) through the Women's Business Enterprise National Council (WBENC). - Research and Development Solutions

<http://www.kforce.com/>

L-3 Communications National Security Solutions (NSS)

L-3's National Security Solutions (NSS) group provides full-spectrum cyber operations, enterprise and mission information technology, intelligence operations support and operational infrastructure support through integrated engineering, adaptive processes, and the expertise required to solve critical security challenges. From systems architecture and engineering to application development and cyber solutions, we have the experience and cleared professionals to help sort, protect, and analyze vast, disparate databases, with the products and technologies from other L 3 segments to securely transmit actionable information to users. For more than 30 years, NSS has been a trusted partner to DoD; the intelligence community; federal civilian, state, and local governments; and international customers. NSS' global presence spans 28 locations, including 11 cleared facilities and employ more than 5,000 professionals. NSS rigorously applies industry best practices, standards-based processes, quality management, and expertise in evaluating and applying emerging technologies to meet our customers' ever-changing mission needs.

<http://www.l-3com.com/>

Lockheed Martin Corporation

Headquartered in Bethesda, MD, Lockheed Martin is a \$46.5B global security and aerospace company operating in 572 facilities in 500 cities and 46 states throughout the United States (U.S.); internationally, business locations in 75 nations and territories. The corporation is principally engaged in the research, design, development, manufacture, and integration and sustainment of advanced technology systems, products, and services. Of our 118,000 employees, 80,000 are scientists, engineers and information technology (IT) professionals. To effectively support the mission of our national and international customers, we align our best practices and capabilities with their priorities—whether it is on the battlefield, protecting the homeland, or managing government information systems.

As a global security and IT company, the majority of Lockheed Martin's business is with the U.S. Department of Defense and other U.S. federal government agencies. In fact, Lockheed Martin is the largest provider of IT services, systems integration, and training to the U.S. Government. The remaining portion of Lockheed Martin's business is comprised of international government and some

commercial sales of our products, services, and platforms. Lockheed Martin's primary capabilities include:

- Defense and Intelligence
- Homeland Security
- Systems and Information Technology

The Newberry Group

Newberry Group is an experienced team of highly-skilled, certified information assurance and IT support professionals with security clearances serving federal, state and local governments and commercial markets. Our team enables organizations to improve bottom line results by reducing complexity, improving efficiency, and reducing the risks and threats often associated with the introduction of new technologies. As an IT firm, with a specialty in information assurance Newberry Group provides: Digital Forensics and Incident Response; IT Support Services; Consulting, integration and reseller Services as well as Training and Education.

Cyber Security Solutions

- **Data Protection** – Enabled by a comprehensive face-to face needs assessment, our distinctive suite of budget-smart solutions can be implemented rapidly to secure your data.
- **Bring Your Own Device (BYOD) Security** - Our BYOD solution takes the guess work out of how to securely and efficiently allow personal and mobile device usage of the network.
- **Virtualization Security** – While addressing the risks created by virtualization, we help regain visibility and control, simplify deployment, achieve PCI compliance, and defend against malware.
- **Borderless Security** – We address new threat vectors across Internet-enabled applications by providing real-time security scanning and protection.
- **Secure Mobility** - We offer asset visibility and control, device management, and supplementary next-generation security protection on and off premise.

IT Support Services

Newberry Group's IT support and integration services are proactive and personalized to each organization. Our services include implementation, support and installation, training, configuration management, network administration, network contingency operations and recovery, and help desk support. By increasing your on-site staff, Newberry offers:

- Computer Network Defense (CND)
- Technical Architectural Development
- System Engineering
- Network Engineering
- Network Management /Administration
- Data Center Operations Support
- Help Desk/Service Desk Support
- Program Management
- Database Design and Administration
- Independent Verification & Validation (IV&V)

Digital Forensics & Incident Response

- **Digital Forensics** – Using industry standard practices and in-depth experience, we preserve and analysis digital evidence in support of litigation, incident response, and regulatory compliance.
- **Incident Response** – Prolonged Information security incidents leave an organization vulnerable and dramatically increase enterprise losses. We have extensive experience in containing and investigating these incidents while deploying response plans to halt unauthorized activity and restore IT systems to an acceptable state of trust.
- **Malware Analysis** - A proper incident response must include malware analysis. Newberry's comprehensive capabilities include reverse engineering, detailed reporting, and payload analysis.

Training & Education

- Vendor-certified training on our technology partner products.
- Custom training classes available
- Curriculum development and distance learning solutions

PSI International, Inc. (PSI)

PSI International, Inc., founded in 1977, is a Fairfax, Virginia-based company that provides a blend of health sciences, social services, and technology support services to our clients throughout the world. The broad spectrum of services we offer support the missions of organizations that greatly impact those living in our communities. Our success is a direct result of understanding each customer's objectives, challenges, and environment. As a result, we have earned a reputation for innovation, consistency, and quality – ultimately resulting in an outstanding legacy of customer satisfaction.

PSI came of age as a traditional information technology company providing technical expertise in information technology (i.e., applications, databases, networks, cloud-based computing and mobile platforms) analysis, design, development, testing, implementation, operations and maintenance; imaging; flight simulation systems; records information management systems; as well as expertise specific to various scientific disciplines. Through the years, we have acquired and developed substantial subject matter expertise in health information systems, transportation, geographical information systems, mobile applications, health sciences and social services, as well as substantial knowledge of the Department of Veterans' Affairs (VA) business domains, processes and applications. PSI has supported the VA since 1987, and is very familiar with the challenges of designing, developing, rolling out and maintaining systems for the VA on a nationwide basis. PSI's success at VA is evidenced by the wide-variety of IT support projects that we have been involved in: Education FOCAS, Loan Guaranty System (LGY), Debt Management Center CARS/CAROLS, Benefits Enterprise Platform (BEP), VA Adverse Drug Event Reporting Systems (VADERS), and Veteran Relationship Management's (VRM) Web Services and Veteran Information Solution (VIS) systems.

<http://www.psiint.com/>
